Title of activity : Computer Software Skill Test (Online)

Organized by : Department of Computer Science

Date : Friday 19-09-2025

Time : 10:50 - 02:30 pm

Venue : Department of Computer Science (Online)

Resource Person (if any): N.A.

No. of participants: 120

Programme/Activity Summary in brief:

The Computer Software Skill Test, conducted entirely online, aims to evaluate participants' foundational competencies in four essential areas: Basics of Computer, Basic C Language, Basic Networking, and Basic Internet usage. This comprehensive assessment is designed for beginners, students, job seekers, and professionals seeking to validate their core IT skills. The test is delivered via a secure, user-friendly online platform accessible on various devices, including desktops, laptops, Mobile and tablets.

Participants are given a specified time window to complete the test, which consists of a blend of multiple-choice questions, coding challenges, and practical scenario-based exercises. The test uses a mix of objective and practical evaluation methods.

Multiple-choice questions check theoretical knowledge, while coding problems and scenario-based tasks assess applied skills and problem-solving capabilities. An automated scoring system provides instant feedback on objective sections, while coding submissions are evaluated for correctness, logic, and efficiency.
